Address: İsmetpaşa Mah. O.S.B , 4.Sokak No:1/A

59510 Kapaklı / Tekirdağ

Tel : +90 212 654 61 00

## **COMPANY PROFILE**

Emerged as a subsidiary of KOM Textile, Turkey's leading swimsuits and underwear producer for 50 years, Pisa Textile actuated its production operations in 1988 in the field of knitting, dyeing, printing and finishing for knitted fabrics as it is the only one fully integrated company in Turkey within its own niche segment.

Keeping a close eye on the latest scientific and technological developments since the very first day of its incorporation, Pisa Textile has specialized in the field of technical textile, promoted by highly qualified manpower and advanced R&D facilities, and attained a superior capacity enabling production of high value-added fabrics in line with latest trends, with a customer portfolio featuring apparel industry companies, mainly dealing in export, along with Kom Textile.

With its 250 highly qualified staff and production capacity of 25 tons per day, Pisa Textile continues to pioneer the industry with its outstanding ability especially in the production of synthetic and elastane blended fabrics maximizing customer satisfaction. Our fully integrated and conditioned production line exists for knitting, dying , printing , finishing and quality control departments.

Knitting department has 3 divisions warping, warp knitting, circular knitting. Warping unit is for beam preparation for pa/pes yarn beams and elasthane yarn beams that allow us to use only in-house made beams for warp knitting machines that is important for quality control from the first step.

Dying department is established for dying fine gauge circular knitted fabrics and warp knitted fabrics in HT dyeing and beam dyeing machines in a wide range of capacity machines with fully automatic dilution system (Data colour automatic dosing system from Italy for dyestaff and chemicals & auxiliaries) works with automatic recipes ensures production without any intervention.

High resolutioned digital inkjet prints from Mona Lisa for polyamide fabrics and sublimation prints for pes based fabrics are also facilitating in print department to reach maximum quality with printed fabrics.

## **PRODUCTS:**

Our core Production includes synthetic fabrics made with polyamide, pes, micro-pes, recycled pes, recycled polyamide with/without LYCRA®/elasthane.

We also produce high-end qualities with organic wool, silk, Ecovero viscose and modals, 2 ply mercerized cottons with 60's, 70's, 80's blends with Pima cotton.

We also produce fabrics with all technical finishes such as anti-bacterial, quick dry, moisture management, body heat control, water repellent, cool fresh, cold black etc...

Our fabric collection consists of:

- Swimwear fabrics in different weights, compositions including fancy structures and Prints
- Lingerie fabrics in different compositions with fashionable prints
- Active-wear fabrics in high stretch compositions with high-technology advantages for maximised comfort
- Charmeuses, powernets, meshes to support lingerie and activewear line
- Wide variety of lining fabrics to support Swimwear Line
- GOTS certified Organic wool blends with silks
- GRS certified Recycled Fabric blends in pes and pa
- Mercerised fabrics in high end cotton blends and eco-vero viskose blends
