

ACTIVEYARN®

südwollgroup

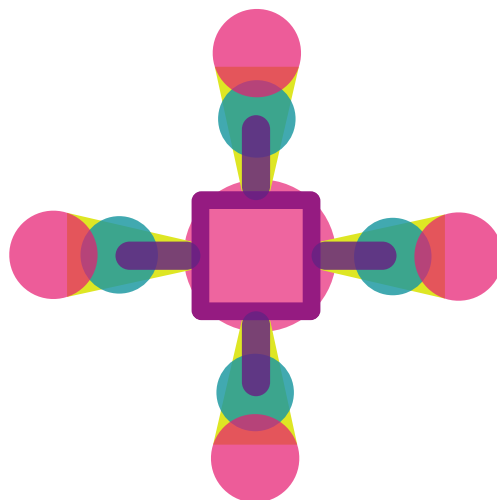

If we decide to view things from a different angle, we uncover new opportunities and begin to understand everyone's requirements. This is the essence of active change that moves our creativity.

Our vision is to craft high-quality products that precisely align with our customers' needs, organised into various collections for flat and circular knitting, weaving, hosiery, and technical applications.

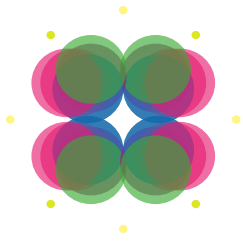

But what if we shifted our perspective and utilised our resources more proactively to establish new connections? Just like in a kaleidoscope, where you encounter new shapes and facets by staying active and in motion!

Join us in turning our Südvolle Group kaleidoscope with our ACTIVEYARN® collection, and explore versatile combinations for new applications that cater to your unique needs.

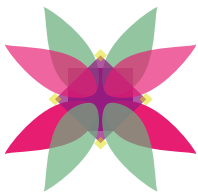

These areas are the drivers of our innovations.

Sustainability

Our entire design and production process is geared towards minimising our environmental footprint. We work to create environmentally friendly products, innovate with sustainable technologies, and refine our processes. Our commitment to sustainability is woven into every facet of our operations, always considering the values and people behind the process. Shift your perspective towards sustainability and get active!

Traceability

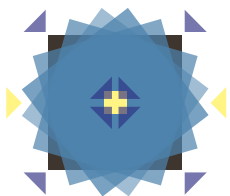

We lead the way in crafting transparent supply chains. Understand your product's journey and trace its origins. Our commitment extends to fashioning a clear, controlled, and traceable production cycle, all the way to the finished garment, surpassing industry standards.

Circularity

Get active and dive into combinations, blends and concepts featuring recycled fibres, reused materials and other circular elements. Join us in our mission to use resources more efficiently, crafting eco-friendly, long-lasting products and garments.

Technology

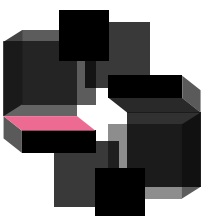

Discover the full potential of our collections, grounded in our commitment to innovation. We constantly embrace the latest spinning technologies, experimenting with new techniques and conducting research. Our adoption of digital tools allows us to streamline processes and stay agile, aligning with your evolving needs.

Performance

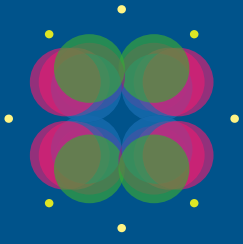

We enhance the extraordinary natural properties of wool and other fibres that we choose for our products, carefully selecting each one like the pieces in a kaleidoscope. Through ongoing research, we craft our yarns to perform at their best, infusing them with unique functionalities for the finished garment.

Design

Here creativity knows no boundaries and imagination dances with colour. Explore a world of forms, effects and shades, from vibrant visions to timeless elegance, from artistic fusion to nature's tranquillity. Our collection mirrors a kaleidoscope of possibilities in colours, materials and constructions, waiting for you to uncover them.
