

## ABOUT US

**Combining our exceptional know-how and technical expertise, we promise growth as an innovative company.**

Starting as a wool-specialized enterprise under the name 'Seri Trading Company' in 1960, we evolved into Grubig Co., Ltd. in 2000, focusing on the import and export (and domestic development) of raw materials and yarns. Currently, we are developing and producing yarns suitable for various purposes and creating fantastic circular knit fabrics.

We supply raw materials not only to domestic cashmere/wool and semi-cashmere factories but also from certified yarn factories in China and India to domestic weaving and knitting factories, exporting to third countries as well.

Always prioritizing quality, competitive pricing, and timely supply, we take pride in combining long experience and theoretical knowledge to achieve the best outcomes, considering the unique characteristics of the textile industry.

## BUSINESS AREA

### SOURCING

Over the years, we have built trustful relationships through collaboration with domestic and international factories. Our partners worldwide ensure the stability of quality. We introduce a wide range of competitive products that meet the demands of buyers in terms of new materials, quality, and price. We possess the agility to quickly adapt to the latest trends.

### OEM/ODM DEVELOPMENT

With over 20 years of experience, our R&D engineers, who are experts in technology, develop and plan highly competitive yarns. Starting from the basics of textile raw materials, our extensive understanding and expertise allow us to present rational and technically innovative products.

### FABRIC PRODUCTION

Along with our raw material & yarn division, we start from the most fundamental grade selection of raw materials, utilizing craftsmanship to meet customer needs with the best products. We produce a variety of innovative products directly in South Korea, offering them to our customers.

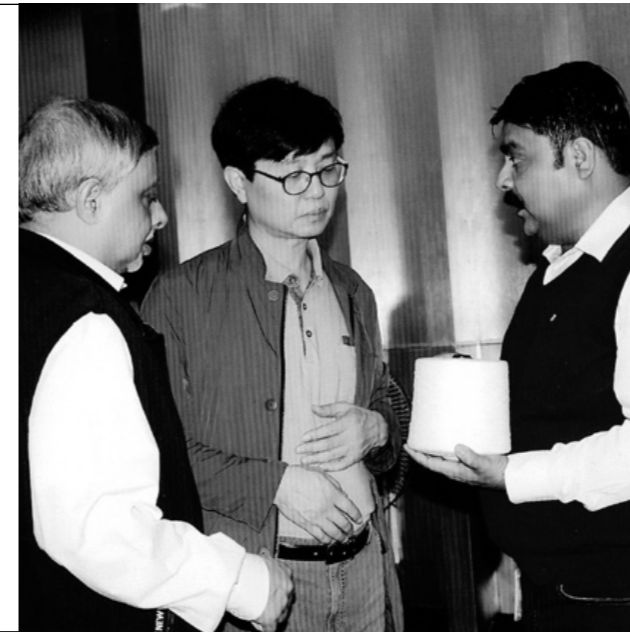

## DIVISIONS

### RAW MATERIALS & YARN DIVISION

Under the leadership of Mr. Ha, we take pride in our ability to source the finest yarns and materials from around the globe.

Textile raw materials are primarily categorized into natural fibers (cotton, wool, linen, silk) and synthetic fibers (polyester, nylon, acrylic, viscose, etc.). The ongoing challenge is how to harmoniously blend these materials, whether it's combining natural fibers with each other or with synthetic fibers, and determining the method (such as cotton spinning, wool spinning, cashmere spinning, etc.) to produce the yarns that consumers desire.

Grubig Trading has established itself as a company that transcends the boundaries of materials, spinning methods, and countries, producing a diverse range of products through this yarn design process. We are continuously researching and innovating to provide yarns with the varied characteristics that consumers seek.

### JERSEY DIVISION

Guided by the vision of Mr. Yoon, we take pride in unveiling a unique expertise that consistently surprises our market.

Launched in 2020, our Jersey division at Grubig is showcasing new and original products by effectively combining Grubig's innovative raw material and yarn technology. Adhering to the principle of 'Fabric Made In Korea', we primarily use natural materials such as Wool and Linen to offer products that are distinct from existing ones.

At Grubig, we believe in continuously expanding the boundaries of creativity and originality. Our Jersey division is where tradition meets innovation, constantly exploring new directions to offer products that combine outstanding quality with aesthetic appeal.

### R&D CENTER

Under Mr. Lee's leadership, top engineers from various fields are gathered to continuously conduct innovative research.

In the textile industry, it's challenging to achieve outstanding results with expertise in only a single field. Therefore, engineers from various specialties at Grubig are collaborating, each fulfilling their role and dedicating themselves to research. Mr. Lee integrates this diverse expertise and adds his own specialization to create the highest level of technology.

## KEY MEMBERS

CEO

#### Ha Sung-Hwan

- Bachelor's degree from Konkuk University
- Graduated from a wool-specialized school in New Zealand (Lincoln college)
- Worked as a wool agent at Seri Trading Company since 1987
- Founded Grubig Trading Co., Ltd. in 1999

President of Fabric Business Division

#### Yoon Young-Hwi

- Bachelor's degree in Textile Engineering from Seoul National University
- Former R&D researcher at SAMSUNG Textile
- Former CEO of Jeil Jersey Ltd.

Director of Research Institute

#### Lee Cheol-Hee

- Bachelor's and Master's degrees in Textile Engineering from Seoul National University
- Former researcher at Samyang Corporation Research Institute
- Formerly worked in Quality Control at Daehan Synthetic Fiber
- Former researcher at Sungil Industry Research Institute
