

UNIFI's Textile Takeback program transforms polyester fabric waste into traceable REPREVE fiber and yarn

REPREVE powered by Textile Takeback helps reduce environmental impact with a solution that is at scale, now.

- 92 million tons of textile waste ends up in landfills every year and over 15% of fabric in clothing production ends up on the cutting room floor.*
- Textile Takeback reduces fabric production waste by transforming it into raw material to be created into new sustainable products.

Available in:

- REPREVE Polyester Filament Yarn:
- REPREVE Polyester Staple Fiber for Spun Yarns:
 - 1.4D x 38mm
- REPREVE Polyester Staple Fiber for Nonwovens:
 - Black: 3D x 64mm, 6D x 64mm

REPREVE powered by Textile Takeback is crafted from 100% recycled polyester raw materials with at least 50% of the recycled content coming from textile waste.

Participate with UNIFI's Textile Takeback program by:

- Recycling your own polyester waste (check requirements with your sales account manager)
- Producing your products with our traceable REPREVE fiber or yarn powered by Textile Takeback

To send polyester waste to UNIFI, you must ensure it meets all requirements first. REPREVE® and Textile Takeback™ are trademarks of Unifi, Inc. in the US and other regions.

CERTIFIED FOR RECYCLED CONTENT CLAIMS REPREVE fabrics are certified by SCS Global Services (SCS) for recycled content claims. SCS is a leading third-party certifier and standards developer of environmental and sustainability claims.

GLOBAL RECYCLED STANDARD CERTIFIED The Global Recycled Standard verifies recycled material and tracks it from the source to the final product. The GRS includes strict social, environmental, and chemical requirements.

To qualify for REPREVE branding, fabrics must be certified to contain a minimum of 30% REPREVE by weight of total fabric construction. REPREVE.com, UNIFI.com, TextileTakeback.com
