

Another record for Performance Days

Munich-based exhibition Performance Days is celebrating another record after its latest edition welcomed more than 2,000 visitors for the first time.

A total of 2,001 trade visitors attended the recent show, which took place from November 8-9 at Munich's MTC exhibition centre. This was an increase of 7.1% compared to November 2016.

Exhibitors numbers were also up this autumn. There was a 9.9% increase compared to November 2016 as 177 exhibitors from 23 countries occupied the full capacity of the show's halls.

The organisers said this increase supported its decision to relocate the show next year. From November 2018, it will take place at the Messe München site.

The final Performance Days at MTC Munich will take place from April 18-19, 2018.
